

I impore you to REJECT the NAB petition 04-160. We satellite radio subscribers pay a monthly fee for better service than normal radio. We pay for no commercials. We pay for traffic and weather. There is no legal boundary for NAB to force a new and improved system to provide local traffic and weather. Is this not the land of the free? Land of making the most of yourself and starting businesses without interference? The FCC has more pressing needs to focus their attention on - naked breasts during the SuperBowl, vulgar language, etc. Save time and money by flat rejecting this frivolous petition.

Matt
